

**CLAIM AMENDMENTS**

Claim 1 (currently amended): A textile coated with a film comprising [a] an amorphous coprecipitate [or a copolymer] of iron oxide hydroxide and aluminum oxide hydroxide.

Claim 2 (currently amended): The textile of Claim 1 wherein the iron oxide hydroxide within said amorphous coprecipitate is comprised of a majority of [substantially] goethite.

Claim 3 (original): The textile of Claim 2 wherein the coating comprises goethite and aluminum oxide hydroxide in a range of ratios by weight of from 30:1 to 1:1.

Claim 4 (currently amended): The textile of Claim [3] 1 wherein the [coating] coprecipitate comprises iron (III) oxide hydroxide and aluminum oxide hydroxide in a range of ratios by weight of from 20:1 to 2:1.

Claim 5 (currently amended): The textile of Claim 4 wherein the [coating] coprecipitate comprises iron (III) oxide hydroxide and aluminum oxide hydroxide in a ratio by weight of 20:1.

Claim 6 (canceled): A water filtration article comprising the textile of Claim 1.

Claim 7 (new): A textile coated with a film comprising an amorphous copolymer of iron oxide hydroxide and aluminum oxide hydroxide monomers.

Claim 8 (new): The textile of Claim 6 wherein the iron oxide hydroxide within said amorphous copolymer is comprised of a majority of goethite.

Claim 9 (new): The textile of Claim 8 wherein the copolymer comprises goethite and aluminum oxide hydroxide in a range of ratios by weight of from 30:1 to 1:1.

Claim 10 (new): The textile of Claim 7 wherein the copolymer comprises iron (III) oxide hydroxide and aluminum oxide hydroxide in a range of ratios by weight of from 20:1 to 2:1.

Claim 11 (new): The textile of Claim 10 wherein the copolymer comprises iron (III) oxide hydroxide and aluminum oxide hydroxide in a ratio by weight of 20:1.
